

# Limit\_Less

Follow your love –  
it will bring you into lot of troubles,  
but this is the way to live  
a creative life beyond limits

Most creative individuals are “created’ by loving  
but demanding parents.  
They grow and harden in challenging environments.  
And flourish in conditions  
favorable for wild ideas and works.

Nature’s creations are always in progress  
Human creations are flickering flames  
What is done is finished!

The definition of creativity is different amongst  
every single person,  
and everyone sees creativity  
in a different light.

A creative person is born, not made  
He or she just can’t be ordinary  
It lasts for a lifetime  
to enjoy your own creativity

Creativity is a possibility ....  
to discover the impossible  
to break the limit  
to open up the parachute  
( of your own mind)

Everything is limited,  
including creativity.  
What is important  
is to not stop testing the limits.

To distance yourself  
readily, at any time  
from the environment  
gives you valuable  
creative quality time

Only through the struggle  
in one’s pilgrimage to knowledge  
can they ever realize  
what they want from life

## NEW ASSOCIATIONS BY CHANCE

Learn every day,  
play any way

Creativity is itself limitless,  
but situated in the human world,  
it is always oriented  
towards a concrete problem.

Concreteness comes from  
ethical norms,  
cultural forms,  
societal structures.

Making ourselves conscious for concreteness  
makes virtual creativity existent.

Creativity is an inner force  
which we use to make connections,  
both internal and external.

Despite of the surrounding atmosphere,  
a creative person should have the courage  
to be alone in majority  
to have the will to express  
what he has thought,  
in order to contribute  
something new in his field,  
which can touch others and  
makes them be reflective.
